Environmental Summit II 2003

Regional Resource Guide

Introduction to the Regional Resource Guide 2003

The Regional Resource Guide links people with their capabilities with their resumes with their resource managers.

This is good because it facilitates team building.... problem solving!

Introduction to the Regional Resource Guide 2003

- **Part One:**
 - find someone who can do a specific task
 - learn more about your colleagues capabilities
 - learn more about the Corps functional groups
 - just snoop
- **Part Two:**
 - access limited to resource managers
 - links Corp functions with capabilities
 - links personnel with capabilities
 - links individual resumes

Janis E. Hulla, Ph.D., D.A.B.T.

Senior Toxicologist

AREAS OF EXPERTISE

Toxicology
Risk Assessment &
Management
Health Risk Policy
Chemistry
Pharmacology
Genetics
Microbiology
Molecular Biology
Environmental Pathology
Biomedical Research
Grant Writing
Project Management

EDUCATION

Pacific Northwest National
Laboratory, Molecular
Biology, Post-doc, 1992

University of Washington
School of Medicine, 1989
Ph.D., Pharmacology

Montana State University:
1982, M.S., Biochemistry

Montana State University,
1977, B.S., Microbiology

BOARD CERTIFICATION

Diplomat of the American
Board of Toxicology

REPRESENTATIVE EXPERIENCE

I serve as a technical expert on environmental risk for the USACE South Pacific Division. My work includes reviewing technical documents, developing and recommending policies, regulations, special studies, and guidance regarding hazardous, toxic, radiological waste. I have over 25 years of experience in the environmental health sciences that includes:

From 7/3/2000 to 7/2/2001, I held a temporary Senior Fellow appointment at the National Institute of Environmental Health Sciences. I conducted biomedical research in the field of molecular genetics of chemical induced cancer.

I was a tenure-track faculty member of the University of North Dakota School of Medicine, Department of Pharmacology and Toxicology from 1/1/96-6/30/99. I conducted basic research in the field of molecular genetics of chemical induced cancer. As a Principal Investigator, I successfully competed for over \$550,000 in research funding. Two students received Master's of Science in my research laboratory. I was an member of the graduate faculty and taught Autonomic Pharmacology in the Medical School. I served on the University's Loss Control and Policy Review committees.

The North Dakota State Health Officer appointed me State Toxicologist 1/95. I served until 4/96. The administrative duties of the State Toxicologist are mandated in the North Dakota Century Code and include certifying the fair administration of the state's Driving Under the Influence Program and the Highway Fatality Survey Program. I held responsibility for the Office of State Toxicologist including 4 chemists and 1 administrative assistant.

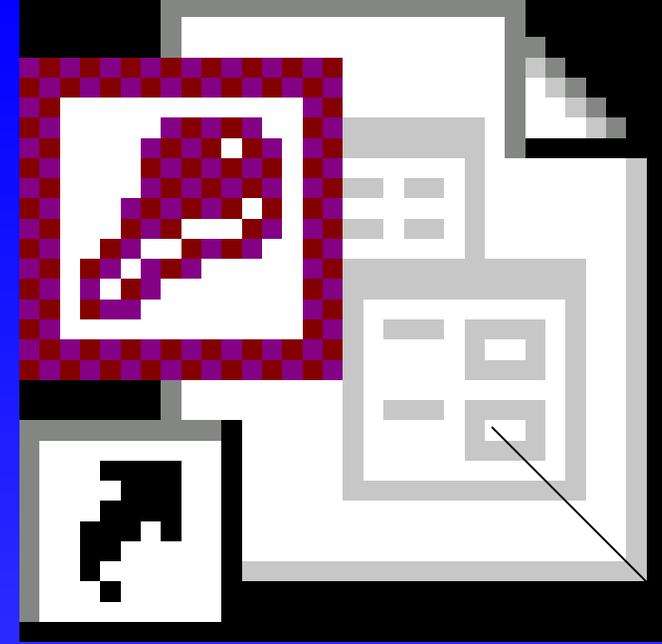

Concurrent to my faculty and State Toxicologist appointments, I served the North Dakota State Health Department as an advisor on issues of Environmental Toxicology. I co-managed an EPA-funded risk assessment project for the state.

Introduction to the Regional Resource Guide 2003

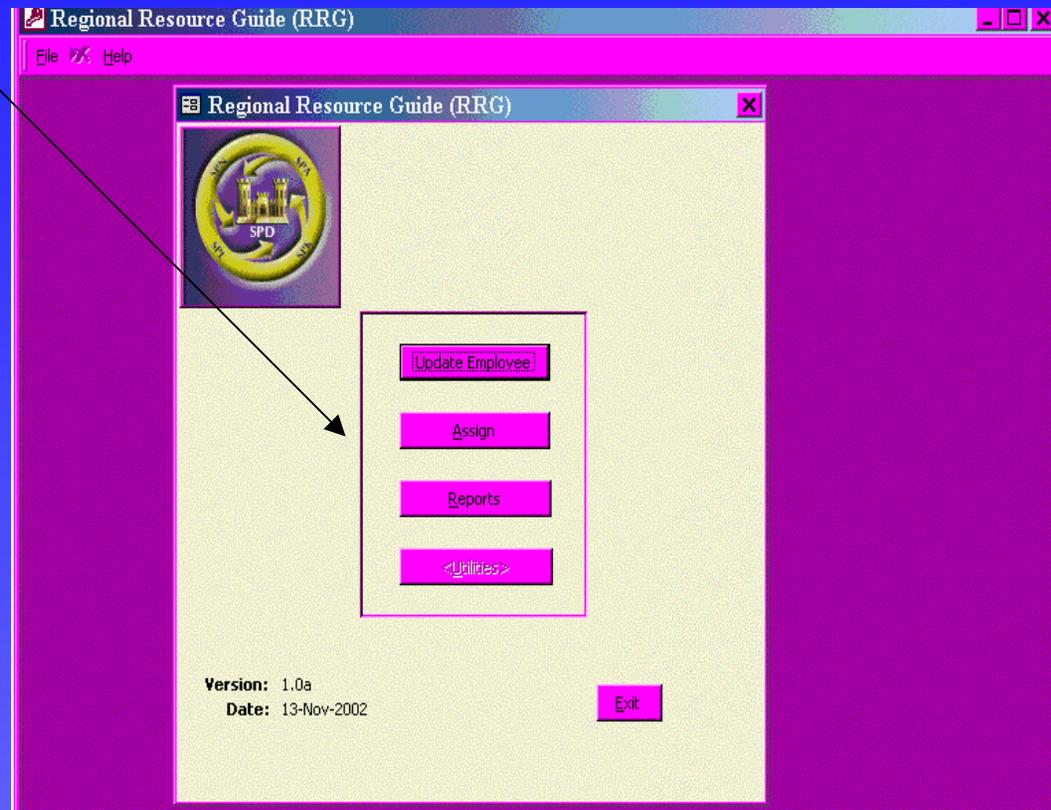

- **Part One:**
 - find someone who can do a specific task
 - learn more about your colleagues capabilities
 - learn more about the Corps functional groups
 - just snoop
- **Part Two:**
 - access limited to resource managers
 - links Corp “functions” with “capabilities”
 - links individuals with capabilities
 - links individuals’ names with resumes

Molecular Biology
Environmental Pathology
Biomedical Research
Grant Writing
Project Management

EDUCATION

Pacific Northwest National
Laboratory, Molecular
Biology, Post-doc, 1992

University of Washington
School of Medicine, 1989
Ph.D., Pharmacology

Montana State University:
1982, M.S., Biochemistry

Montana State University,
1977, B.S., Microbiology

BOARD CERTIFICATION

Diplomat of the American
Board of Toxicology

REPRESENTATIVE EXPERIENCE

I serve as a technical expert on environmental risk for the USACE South Pacific Division. My work includes reviewing technical documents, developing and recommending policies, regulations, special studies, and guidance regarding hazardous, toxic, radiological waste. I have over 25 years of experience in the environmental health sciences that includes:

From 7/3/2000 to 7/2/2001, I held a temporary Senior Fellow appointment at the National Institute of Environmental Health Sciences. I conducted biomedical research in the field of molecular genetics of chemical induced cancer.

I was a tenure-track faculty member of the University of North Dakota School of Medicine, Department of Pharmacology and Toxicology from 1/1/96-6/30/99. I conducted basic research in the field of molecular genetics of chemical induced cancer. As a Principal Investigator, I successfully competed for over \$550,000 in research funding. Two students received Master's of Science in my research laboratory. I was an member of the graduate faculty and taught Autonomic Pharmacology in the Medical School. I served on the University's Loss Control and Policy Review committees.

The North Dakota State Health Officer appointed me State Toxicologist 1/95. I served until 4/96. The administrative duties of the State Toxicologist are mandated in the North Dakota Century Code and include certifying the fair administration of the state's Driving Under the Influence Program and the Highway Fatality Survey Program. I held responsibility for the Office of State Toxicologist including 4 chemists and 1 administrative assistant.

Concurrent to my faculty and State Toxicologist appointments, I served the North Dakota State Health Department as an advisor on issues of Environmental Toxicology. I co-managed an EPA-funded risk assessment project for the state.
